

AluINNO

aluminium product competition

This year 2023 AluInno competition has a renewed concept and it has two separate categories: company category for companies and personal category for individual people for example students and new graduates. The aim of the competition is to find brand new or already existing innovations in which the advantages of aluminium are applied.

- **No competition entry fee**
- **Cash price of 2000 € for the winners of both categories. Other finalists receive expense reimbursement**
- **Entries due 6.10.2023**

The board of the Aluminium product branch group of Technology Industries of Finland will select finalists which are presented at Aluminium Days exhibition. The winner is selected from the finalists. In addition to cash award, the best entries of the competition will receive visibility at Aluminium Days Seminar and in aluminium industry publications.

The Company Category

The company category is aimed for companies that have utilized aluminium in an innovative way either in their product or service or have enhanced usage of aluminium in new applications. The entry may be either brand new or already existing concept.

The Personal Category

The personal category is aimed for all individual people, such as students, new graduates, retired and other people who have an innovation including aluminium in some way or enhanced usage of aluminium in Finland.

**Design from
aluminium
and win
2000 €**

How to enter:

Submit a short written presentation of the entry explaining the main idea of the entry and why it should be rewarded. Depending on the subject, photos are also appreciated. Include the names, contact information and possible company of the participants involved. Tell also where did you hear about the competition first.

E-mail for submitting entries:
reeta.luomanpaa@teknologiateollisuus.fi
Entries are due 6.10.2023

Competition rules

1 Qualifications for Entry

The company category is aimed for Finnish companies (including subsidiaries) that have utilized aluminium in an innovative way either in their product or service or have enhanced usage of aluminium in new applications. The entry may be either brand new or already existing concept.

The personal category is aimed for individual people, such as students, new graduates, retired and other people who have an innovation including aluminium in some way or enhanced usage of aluminium in Finland.

2 Competition Time

Entries for Aluinno 2023 competition are due 6.10.23

3 Participation

Submit a short written presentation of the entry explaining the main idea of the entry and why it should be rewarded. Depending on the subject, photos are also appreciated. Include the names, contact information and possible company of the participants involved.

4 Evaluation Criteria for Entries

The main evaluation criteria for Aluinno competition is to find products, components or services where aluminium has an essential importance on innovation, structure and manufacturing or design.

5 July 2023

The board of the Aluminium products branch group of Technology Industries of Finland will select finalists for each category which are presented and rewarded at Aluminium Days exhibition. The winner is selected among the finalists.

6 Awards

Winners of both categories will receive a cash award of 2000 €, other finalists receive expense reimbursement.

7 Rights of Use

The competition organizer has the rights to use the entry in Aluminium Days exhibition in an extent agreed separately with submitter, in presentation events held in the future and also in promotional publication materials.
