FILLING INSTRUCTIONS

Value added for the financial year (concerning only companies with at least 150 employees)

The value added data for 2021 is collected from companies, that employ at least 150 people in the technology industries. Data is collected for membership fee calculation of Confederation of Finnish industries.

1. Wages and salaries Wages and salaries mean all the fixed and variable wages, salaries, fees and commissions recorded in the profit and loss account, including activated labour costs. Also other entries are include subject to withholding tax such as holiday pay and sick pay.
2. Additional labour costs Additional labour costs include statutory compulsory social insurance payments, including employer social security payments, occupational pension insurance payments and other social security costs such as pensions, transfers to pension funds, and personal insurance and incentive payments to unemployment funds. The additional labour costs connected to activated labour costs are also to be stated. If, in the profit and loss account, additional labour costs include other expenses, they are to be separately included.
3. Rents Rental costs are those rental expenses entered into the profit and loss account for plots of land, buildings, premises and other types of rent such as for machinery and equipment, including leasing payments.
4. Depreciation&
Amortisation The depreciations and amortizations made in the company accounts according to companys depreciation and amortisation plan.
A company using absorption costing should also announce depreciations included in material costs in this section. In this section, a company using a function-based profit and loss account should state the scheduled depreciations for the financial year that are included in the expenses of different areas of activity.
5. Profit/loss Profit/loss is announced according to company's income statement. (Profit is positive number and loss is a negative number)
6. Value-added Parts 1-5 in total.
